

Circular Economy Grant - Preliminary Application

The Circular Economy Grant (CEG) program provides funding for non-profit organizations to lead local waste reduction, reuse, recycling, and composting initiatives to help Calgary move to a circular economy.

Through this program, non-profit organizations can apply for \$5,000 - \$25,000 grants for projects. This pilot program started in 2023 and will run through 2026.

A circular economy eliminates waste and pollution, and conserves resources. It is a shift from a throw-away to a circular mindset to extend the lifecycle of goods, food, and resources through better design and continuous reuse, so nothing goes to waste.

Proposed projects should meet one or more of the following objectives:

- Initiate innovative projects and new programs or services to support the movement towards a circular economy.
- Develop innovative methods of recycling or composting collection to reduce the amount of materials going to landfill.
- Enable, empower, and educate individuals, organizations and/or communities to participate in activities that result in the reduction, reuse, or diversion of waste.
- Support individuals, organizations and/or communities who are working towards a circular economy.

- Help individuals, organizations and/or communities that might otherwise be hard to reach and have limited access to programs.
