

THE CITY OF CALGARY
CITY CLERK'S DEPARTMENT

**XV OLYMPIC WINTER GAMES
INVENTORY TO THE
OLYMPIC PHOTOGRAPH COLLECTION**

PREFACE

The City of Calgary Archives is a section of the City Clerk's Department. The Archives was established in 1981. The description system currently in use was established in 1991. The Archives Society of Alberta has endorsed the use of the Bureau of Canadian Archivists' Rules for Archival Description as the standard of archival description to be used in Alberta's archival repositories. In acting upon the recommendations of the Society, the City of Calgary Archives will endeavour to use RAD whenever possible and to subsequently adopt new rules as they are announced by the Bureau.

The focus of the City of Calgary Archives' descriptive system is the series level and, consequently, RAD has been adapted to meet the descriptive needs of that level. RAD will eventually be used to describe archival records at the fonds level.

The City of Calgary Archives creates inventories of records of private agencies as the basic structural finding aid to private records. Private records include a broad range of material such as office records of elected municipal officials, records of boards and commissions funded in part or wholly by the City of Calgary, records of other organizations which function at the municipal level, as well as personal papers of individuals. All of these records are collected because of their close relationship to the records of the civic government, and are subject to formal donor agreements.

Personal papers, included in the general category of Private Records, are described in Registers. These Registers are similar in purpose and content to an inventory, but take into account the characteristics which distinguish such collections from records.

The search pattern for information in private records is to translate inquiries into terms of type of activity, to link activity with agencies which are classified according to activity, to peruse the appropriate inventories to identify pertinent records series, and then to locate these series, or parts thereof, through the location register. Inventories of private records can also be accessed through the inventory of any civic department to which it might happen to be linked.

Existing inventories of private records are revised as additions of records are received and described at the Archives.

INTRODUCTION

The Olympic Photograph Collection described in this inventory includes approximately 6 metres of material which came into the custody of the City of Calgary Archives along with the rest of the records of OCO'88, the organizing committee for the 1988 Olympic Winter Games, held in Calgary 1988 February 13-28. These images were held at the Olympic Hall of Fame but transferred to the City Archives in the fall of 1989; some individual images had remained in the Public Information Department of The City where they were used in the publication of the Official Report, but they were later transferred to the Archives. The City Archives is responsible for describing and providing reference for this material. The photograph collection has consistently been among the most widely used and requested of these Olympic records.

This inventory was prepared by Donna Kynaston in 1991. Two databases were established using Marcon software, one at the series level (including some file and item details for the smaller series) and one at the file level (including some item identification) for the larger series. The inventory was updated in 1996 and in 1998 by Glenda Leslie.

ACKNOWLEDGEMENT

The City of Calgary Archives would like to thank the Calgary Olympic Bid Committee 2002 for its generous support in the publication of this inventory.

ADMINISTRATIVE HISTORY

The photo images described in this inventory form part of the OCO'88 Communications Group fonds; they are a semi-artificial fonds drawn from the Communications Group. The administrative history for that Group, particularly the part dealing with the Information Services Division, will be applicable to these records. The parts dealing with the Community Relations Division and the Products and Advertising Division will be of some use as well.

The custodial history of these records is relatively straightforward. Photo images were initially the responsibility of the Information Services Division, which hired a photographer (Larry Fisher) on an hourly basis, and then in 1986 on a yearly retainer. Also in 1986, the responsibility for cataloguing and filing the photo images was transferred to the Products and Advertising Division. In 1987 Information Services again took on the work associated with producing, storing and referring to the images. This work was done in the Information Office in the Main Press Centre.

Two more photographers (Mike Ridewood and Pat Price) were hired during the Games themselves. The photo images were used by the media and for the Official Report to the International Olympic Committee, as well as by other organizations and individuals.

SCOPE AND CONTENT NOTE

The Olympic Photograph Collection consists of approximately 40,000 photo images (prints, transparencies and negatives) created or commissioned by the Communications Group, one of the six Groups which made up OCO. Most of them are from the Information Services Division. Some, mostly duplicates of those from Information Services, are from Products and Advertising and from Community Relations.

All of this material is in English. Most of the images are in colour, the transparencies are 35mm and enclosed in slide cases, and photo prints are 8 x 10" or smaller. Some of what are referred to as negatives are in fact internegatives made from transparencies. This material is in very good physical condition.

These photo images were commissioned and created for the purposes of publicizing the 1988 Olympic Winter Games before they occurred, of educating people about the Games, and of documenting preparation for the Games and the Games themselves. OCO'88 used them as research material and as a record of its activities.

There are no access restrictions to any of these photo images. They were commissioned with the intention of publicizing and documenting the 1988 Olympic Winter Games, and as such were always meant to be generally open to viewing. Copyright belonged in almost all cases to OCO'88, which transferred it to the City of Calgary Archives, and the usual copyright restrictions apply. The photo images to which OCO'88 did not hold copyright are marked as such.

This is in effect a closed fonds. However, not every image in every series has come to the Archives, in some cases because OCO'88 selected and used only the better examples, and in some cases because images were mislaid at some point. It is possible that images may still arrive from various sources to fill in some of the blanks.

OCO'88 librarians created a detailed filing and numbering system for these photo images, and this original order and system of description has been maintained in this inventory. In almost all cases except in Series I (1988 Negatives), each image is numbered separately. The first set of numbers indicates the series, the second the "file" and the third the item. Therefore, 110.06.0001 indicates the first image in the Olympic Speed Skating Oval file of Series XXIX (Venues - 110). There are 28 similar identifiable series. Some, such as Series XXVI Sports (210) and Series XXIX Venues (110), are very large, while others are very small. Only some of the photographers of these images are identified. A given span of photograph numbers for a particular file or series does not indicate that there are images for every number within that span.

The largest and most significant series described here has a different numbering system. This is Series I (1988 Negatives), which includes all of the images actually taken during the Games (the others were taken prior to the Games to publicize and document the activities of OCO '88 and other related groups and individuals). These negatives are identified by negative sheet, including a number and the initials of the photographer responsible. The three photographers represented here are Larry Fisher, Mike Ridewood and Pat Price. Therefore, PP46 is a sheet of up to 36 negatives taken by Pat Price. These are arranged by subject, and specific dates are provided in almost

all cases.

There is also a small artificial series (XXX), consisting of photo images which came to the Archives identified by subject but not numbered.

These photo images have been placed in different binders and boxes to accommodate different formats, so that images from a particular file may be found in various boxes. All images are contained in Binders 1 to 23 and Boxes 24 to 55 (transparencies in slide form are in 1 to 32, prints, negatives and other transparencies in 33 to 51, and 1988 negatives in 52 to 55). See Appendix I (Box List).

More OCO'88 photo images may be found throughout the administrative records of the organizing committee. These are described separately in the inventories for each of the OCO'88 administrative Groups.

DESCRIPTION OF RECORDS

I. **Communications Group, Information Services Division, 1988 Negatives. -- 1988.-- Approximately 17,800 photo negatives.**

Archival Description: These are the photo images which were actually taken during the 1988 Olympic Winter Games. Almost all of them are 35mm colour negatives. Also included are approximately 50 prints and textual material such as start lists. These images were taken by Mike Ridewood, Larry Fisher and Pat Price, and are all identified as to photographer; the alphanumeric codes following each file number are the numbers assigned to each negative sheet by OCO, and the letters in the code indicate one of the three photographers (PP, MR or LF). File 32-15 (in Box 32) contains alphabetical (by subject) and numerical (by negative sheet) photographers' shoot lists for each of the three photographers.

Scope and Content: This material is contained in boxes 52, 53, 54, 55 and 32. Ten sheets of negatives are missing (see file list).

A file listing follows.

File listing:

<u>Box</u>	<u>File</u>
52	52-01 (PP247-PP249). ABC Studios. February 26, 1988. 60 negatives.
52	52-02 (MR231). Accreditation Badges. April 15, 1988. 36 negatives, 1 print.
