

Enmax Legacy Parks Program — Devonian Gardens

Conceptual images for Devonian Gardens

Project: This project is a complete renovation of North America's largest indoor public garden. The redevelopment focuses on upgrading current infrastructure and delivering a new and revitalized park experience. Upgrades include better long-term operating sustainability and increased revenue flexibility. The redevelopment schedule has been coordinated with the buildings' retail redevelopment, including floor plate and skylight changes.

Budget: \$7.0M Enmax Legacy Parks funding contribution.

Timeline: Park re-opened 2012.
Restaurant opens 2013.

Benefits: Providing a year round park experience under glass, this 2 acre site will provide Calgarians with a garden respite. Extensive tropical planting, walking and seating, as well as a childrens playground, art display space, a corporate events terrace, a three level restaurant and part of the longest continuous skylight in North America will make this an exceptional and unique urban park .
